

PLUMBING/FIRE PROTECTION ENGINEER: EVANSTON, IL

Responsibilities

Here Is What We Have in Store for You

In this role, you will work with and be mentored by experienced engineers and will yourself help to mentor designers. Your initial assignments will include design/drafting for projects, performing load calculations, determining system sizing and layouts, calculating equipment sizes, selecting equipment, completing field surveys, and reviewing equipment shop drawings. As you gain project experience, you will take on a greater role in leading piping/plumbing/fire protection assignments, writing specifications, participating in project meetings with clients and other consultants, and supporting construction-phase and/or commissioning work.

Qualifications

What You Will Need to Succeed

- Associate degree or BSME/BSAE from ABET accredited school.
- Minimum GPA of 2.5.
- EIT certification (Passed the FE exam) a plus.
- ASPE CPD or CPDT a plus.
- MEP consulting engineering field experience preferred.
- Intermediate to advanced user of AutoCAD and/or REVIT software.
- Fundamental knowledge of building systems. Proven experience in at least one discipline such as plumbing, fire protection or medical gas piping systems.
- 3 to 10 years experience designing building plumbing systems.

What Will Set You Apart

- Strong spoken and written communications skills.
- Excellent organization and time management skills.
- Able to effectively prioritize multiple tasks.
- Quick technical comprehension and motivation focused on client solutions.
- Effective working individually and within team environments.
- Quick technical comprehension and motivation focused on client outcomes.
- Effective working individually and within team environments.
- Certified in Plumbing Engineering (CPD) from ASPE.
- Leadership involvement in extracurricular activities/student organizations.
- Healthcare facility design experience.

What GBA Brings
